## DETAILED ACTION

### *Priority*

1. Receipt is acknowledged of papers filed under 35 U.S.C. 119 (a)-(d) based on an application filed in Japan on July 27, 1999. Applicant has not complied with the requirements of 37 CFR 1.63(c), since the oath, declaration or application data sheet does not acknowledge the filing of any foreign application. A new oath, declaration or application data sheet is required in the body of which the present application should be identified by application number and filing date.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. Following are examples and applicant is required to ensure full compliance with 35 U.S.C. 112, second paragraph.

The preamble of the claims are inconsistent.

Art Unit: 3752

Claim 1 recites "consisted of" in line 2 which is a closed transitional phrase and "one or more pressure rooms" in lines 3-4 which is an open limitation.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-3, 7 and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Hess et al. (6,196,219).

Hess et al. discloses a liquid drop spraying device having a liquid sump 9 consisting of a pressure room and outlet 15 and a vibration source 10.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hirota et al.; Takeuchi et al.; Ohnishi et al.; Ross et al.; 57-207708; 57-207709 disclose sprayers having vibrating elements.
